METROMONEY

The cryptocurrency travel platform that seeks the best for you and the world.

PROBLEMATIC:

The issue arose because on certain occasions people have the following problems when taking public transportation.

- The waiting time and arrival time of public transportation.

- There are occasions when people do not know which public transportation route to take to reach their destination.

- The pollution generated in a city, due to so many people using private vehicles, could be reduced by taking public transportation to reach their destination.

- People who do not have much knowledge of the city should not have to pay for private transportation, which can sometimes reach very high prices.

Why now and not before?

- This idea had not been implemented before because the cryptocurrency was not in the boom that it is now, people were not as aware or as confident about what the cryptocurrency was and how it worked, in the same way the transactions of the they did not have the same effectiveness as they do now, because of this we feel that this is why our idea would not have worked as much before.

superteam

METROMONEY

METROMONEY

Why now?

- **Continuous population growth**

- **Excess of vehicles in the city**

- **Excess of vehicles in the city**

- **Private transport getting more and more expensive**

- **Pollution due to vehicles increasing**

Why now?

- It is the perfect time to implement our project because as time goes by there is more population in the cities, and public transportation like that of Mexico, which is not as developed as in other places, becomes somewhat disorganized and tedious to a certain extent.

Why are we the ones to do it?

- Excellent teamwork management

- Multiple project that has been successful together.

- Great ideas for growth from each member

Introducing
METROMONEY

Business Model
Here is how we make/will make money
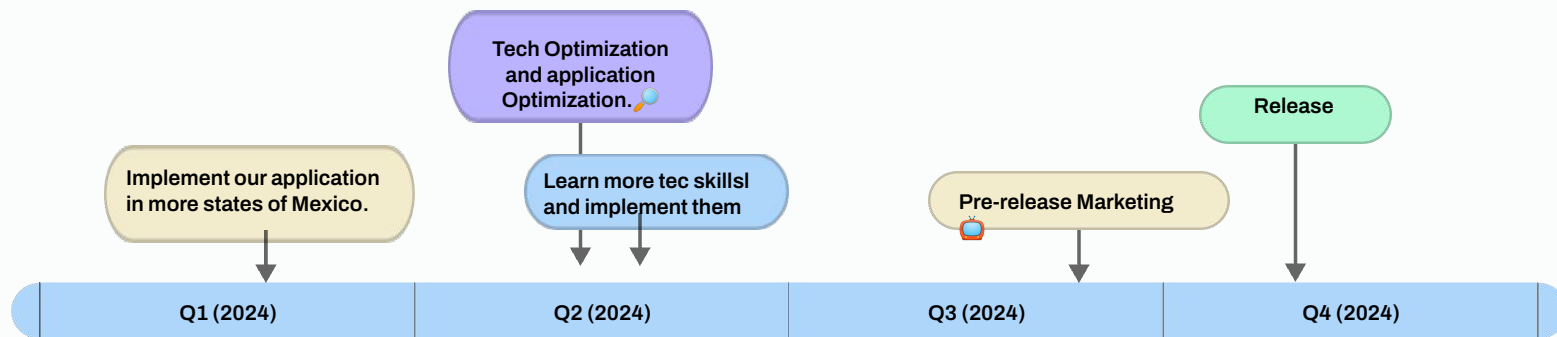

4%
income increase/quarter

6%
income increase/quarter

▌ **Transaction Fees:** We will use a 4 and 6 percent rate on the routes that are used and the location to which you are going.

▌ **Staking Rewards:**
We will offer rewards to our users when taking various trips, such as discounts on trips or free trips.
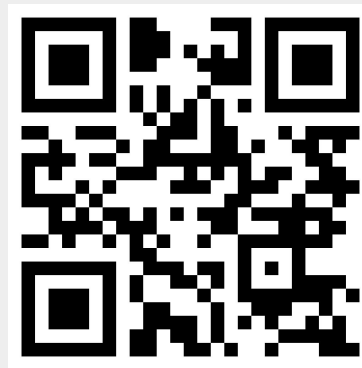

Where will we be next year if we win the hackathon/raise funds?

Nos gustaría poder hacer estos features a futuro

Tech Optimization and application Optimization. 🔎

Implement our application in more states of Mexico.
